I am a Full stack software developer. I understand how to build and debug Restful API's, I have experience using HTML, and CSS, MySQL and npm packages as well as GIT for version control. I have experience working in a pair programming environment and am familiar with using test formats specifically jest. I have experience with front end frameworks like react and have used many other frameworks such as bootstrap, mustache handlebars, bulma, and others such as materialize. I am proficient with JavaScript and other JavaScript related coding, such as OOP and ORM. Additionally I am familiar with using MVC coding structure.

Authorized to work in the US for any employer

Work Experience

Journeyman Laborer

Primoris Services Corporation - Pittsburg, CA

July 2021 to Present

After learning many skills and lessons from my work as a warehouse associate; I journeyed out as a laborer working on pipelines. This job includes: hand excavation, high pressure sandblasting, hand apply and spray coating, shoring with hydraulic jacks, cad-welding, welding road plates, asphalt work, securing a truckload, delivering equipment and much more.

Warehouse Associate

Primoris Services Corporation - Pittsburg, CA

May 2019 to July 2021

I personally managed incoming and outgoing orders for pipeline job sites on live gas lines. While directly under the supervision of the manager I handled: day to day maintenance, stocking, incoming and outgoing shipments, calibration of precision equipment, unloading and loading trucks via forklift or reach lift, and many more tasks.

Education
